

# RECORDING YOUR SCIENCE FAIR PROJECT FLIPGRID VIDEO

**BEFORE YOU START:** make sure you have your script and all of your project materials with you (and documents on the computer open and ready to share if recording through teams). The video should be at least 2 minutes and up to 10 minutes long. Rehearse at least once before recording. Questions? Need help? Email [programs@eastgatepta.org](mailto:programs@eastgatepta.org)

## “MILD” LEVEL RECORDING

Join the Topic by clicking: <https://flipgrid.com/3417f144>

### To record straight up to Flipgrid from your computer or iPad.

Select the Record a Response or red camera icon to open the Flipgrid camera.

1.  **Record the video**  
Select the record button on the bottom of the camera to start and pause the camera. Add fun stickers, filters, text, and more. Tap the arrow on the bottom right to advance.
2.  **Review the video.**  
Trim, rearrange, or add more video clips. Tap the arrow in the bottom right to advance.
3.  **Submit your video!**  
Edit your cover image, name, add a title, or attach a link. Then submit!

OR

### To record a video on your adult’s phone or tablet then **upload to Flipgrid:**

After selecting Record a Response in a Topic, learners can import their own custom video by

1. Open the **Options** button to the left of the record icon
2. Select **Upload clip** to open your device's videos
3. Select the video clip to import
4. Review the clip and select **Add more** to continue adding the Flipgrid video or **Next** to submit the video
5. **Review your video** - Trim, rearrange, or add more. Tap the arrow in the bottom right to advance.
6. **Take a selfie** - The selfie will be the cover image for your video. Tap the arrow in the bottom right to advance.
7. **Submit your video** - Edit your name, add a title, or attach a link. Then submit!

## “MEDIUM” LEVEL RECORDING

### To record a presentation when using Flipgrid:

Students can record their presentations using Flipgrid's screen recorder feature! Whether you created a presentation on Google Slides, PowerPoint, or something else, students can record what's on the screen, narrate with audio, and submit to Flipgrid!

1. Tap the green plus button to open the Flipgrid camera.
2. Select the additional settings  button
3. Select **Screen Recording**.
4. Start the screen recording
  1. Students can head to whatever application they want to record - Google Slides, PowerPoint, or a website!
  2. It will capture anything on their screen and their audio
  3. When done, select "Stop Sharing" and complete the steps to submit the video on Flipgrid!

Whether you're using Google Slides, PowerPoint, Buncee, or any other application to make slides, you can record this on Flipgrid!

Join the Topic by clicking: <https://flipgrid.com/3417f144>

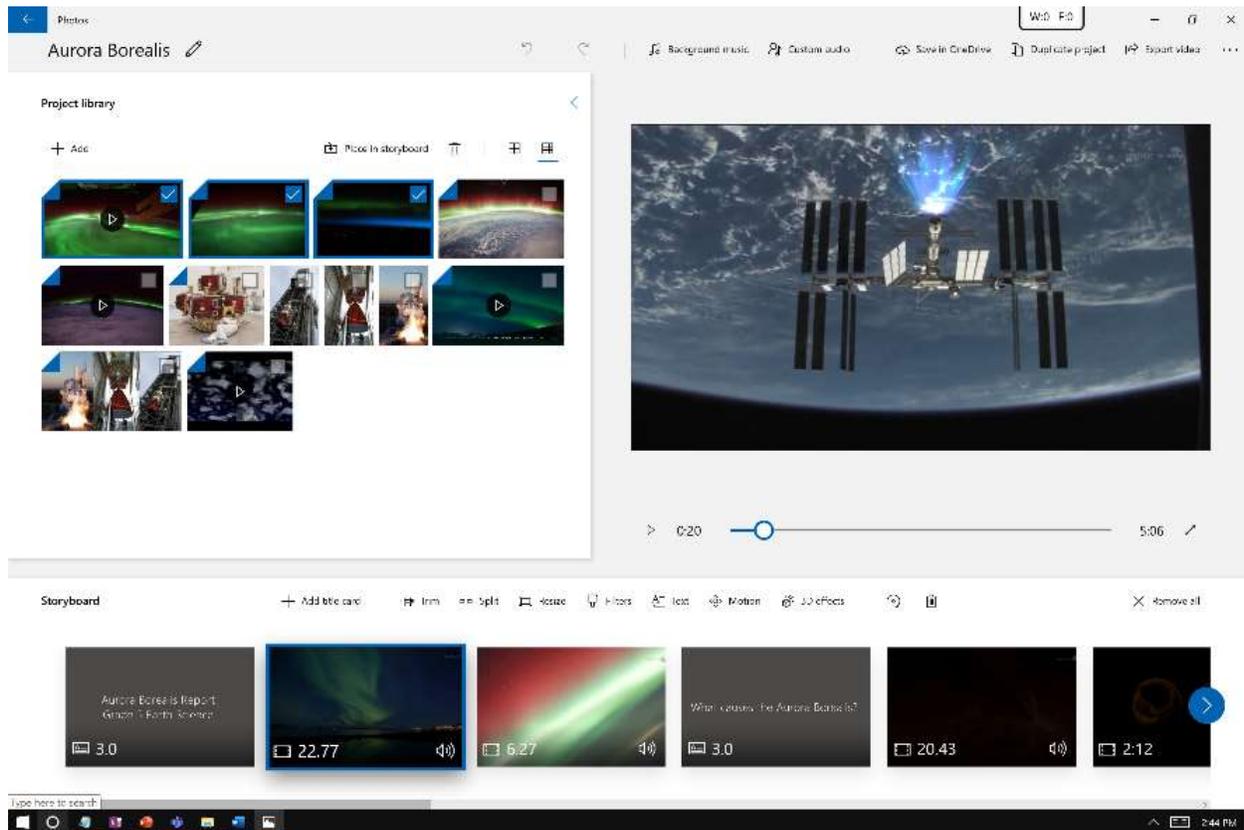

### To record using Teams then upload to Flipgrid:

1. Start a new meeting.
2. To start recording, go to the meeting controls and select More options button > Start recording.
3. While you record, you can share your screen and explain a power point presentation or pictures.
4. The recording is then processed and saved to your OneDrive.
5. The meeting recording shows up in the meeting chat
6. Download and save the video.
7. Follow directions to **upload to Flipgrid** in the MILD section, 1<sup>st</sup> page of this document.

# RECORDING YOUR SCIENCE FAIR PROJECT FLIPGRID VIDEO

## “SPICY” LEVEL RECORDING

Upload an edited film created in Microsoft Video Editor. Windows 10 includes Video Editor, a full-featured set of video creation and editing tools.

### To create a new video that you can edit from start to finish

1. Type **video editor** into the Search bar and select **Video Editor** to launch the app, or launch from the Start menu.
2. Select **New video project**.
3. Name your video.
4. Select the photos, power point slides (one at a time), and videos you want to add to your **Storyboard**. You can even use **Add from web** to find content on Bing.

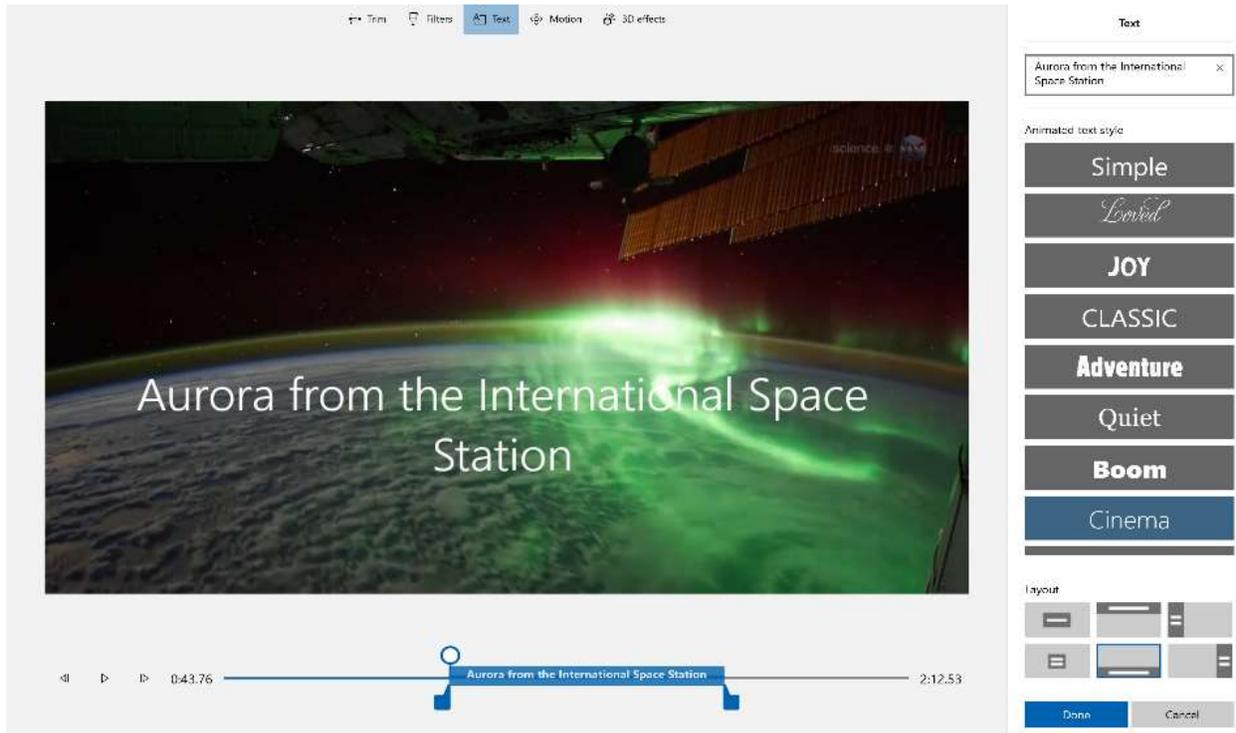

Once you have organized your **Storyboard**, you can change the look and feel of each photo or video clip.

1. Select a button like **Trim** or **Split** for editing (video clips only).

## RECORDING YOUR SCIENCE FAIR PROJECT FLIPGRID VIDEO

2. Select **Duration** to change the length of time a photo is displayed, or select multiple photos and then select **Duration** to change their duration all at once.

### Add text

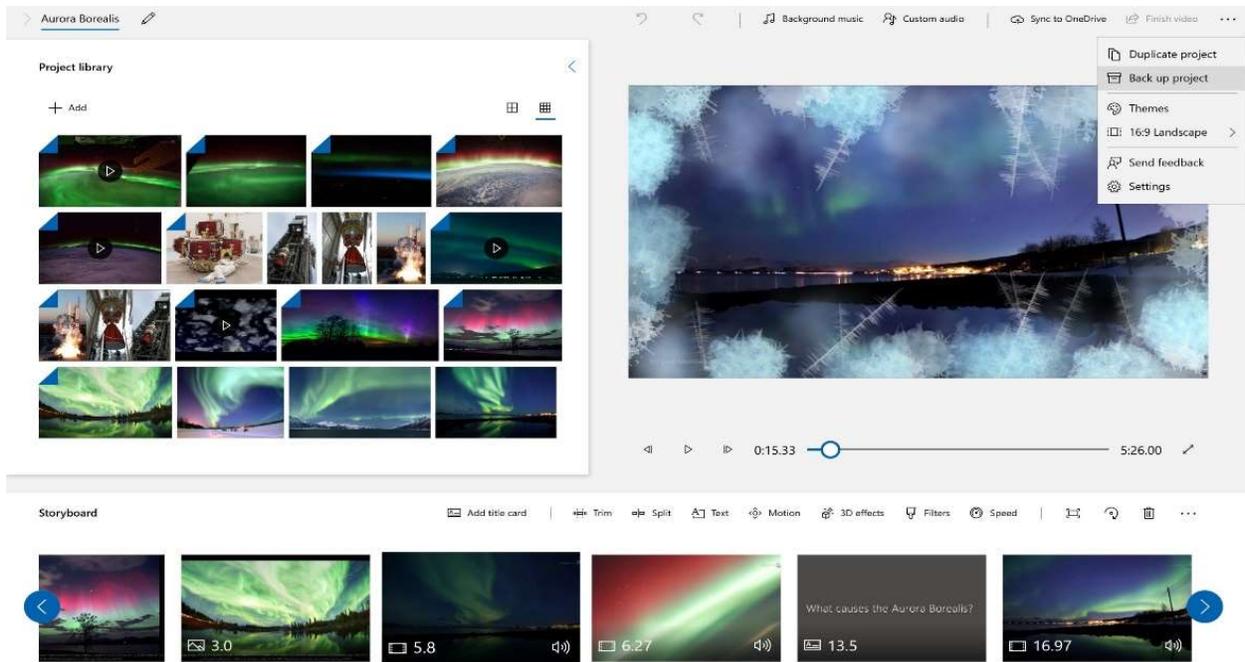

You can add **Text** to photos and video clips with ease. You can also create a **Title Card** from the Storyboard if you'd like to add text to a plain colored background.

Simply select **Text**, type a title or phrase, then select a style and layout. You can also time the text to appear exactly when you want within your film.

### Add effects:

Using the power of Windows 10, you can add 3D objects or special effects to your photos and video clips. Use **Filters** to change your video clip or photo to black & white or other visual treatments. Select **Motion** to give photos more visual interest. Select **Speed** to speed up or slow down a video clip. If you want to change the orientation of a photo or video, just select the **Rotate** icon. If your photo or video is a different aspect ratio than your project, you can select the **Remove or show black bars** icon to zoom in and remove the letterboxing effect.

# RECORDING YOUR SCIENCE FAIR PROJECT FLIPGRID VIDEO

When you have completed your project, select **Finish video** to publish your film. You can control video quality if you wish.

Additionally, you can **Duplicate project** to copy your video, and use **Back up project** to share your project with or save your progress to share between multiple users and devices. You can use **Import backup** to open one of your backed-up projects and continue working.

Save your video. Then follow directions to **upload to Flipgrid** in the MILD section, 1<sup>st</sup> page of this document.
